Sequence 1, Application US/08700651B
Patent No. 6015882
GENERAL INFORMATION CAROLYN
APPLICANT: PETERSEN, CAROLYN
APPLICANT: LEECH, JAMES
APPLICANT: UEECH, JAMES
APPLICANT: GUT, JIRI
TITLE OF INVENTION: VACCINES, ANTIBODIES, PROTEINS, GLYCOPROTEINS, DNAS AND RNAS
TITLE OF INVENTION: PREPRIET STATE OF THE PROPHILAXIS AND TREATMENT OF CRYPTOSPORTIGIUM PARVUM
TITLE OF INVENTION: NEECHONS
FILE REPERENCE: 480.19-4 (HV)
CURRENT APPLICATION NUMBER: US/08/700,651B
CURRENT APPLICATION NUMBER: US/08/15,751
EARLIER APPLICATION NUMBER: 08/415,751
EARLIER APPLICATION NUMBER: 08/415,751
EARLIER APPLICATION NUMBER: 08/415,751
                                                                                                                               1045
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  1226 GAACAATCACTACCACCACAACTCGTACCAATCCAACTGATTCAATTGACACAGTGGTGG 1285

Patent No. US2001001447A1
GENERAL INFORMATION:
APPLICANT: Milhausen, Michael James
TITLE OF INVENTION: TOXOPLASMA GONDII PROTEINS, NUCLEIC ACID MOLECULES, AND
TITLE OF INVENTION: USES THEREOF
FILE REPERENCE: TX-1-C2
CURRENT APPLICATION NUMBER: US/09/216,393
CURRENT FILING DATE: 1999-12-18
EARLIER PEPLICATION NUMBER: 08/994,825
EARLIER FILING DATE: 1997-12-19
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     3257 AAAATTCTGGATTAACTACTTCTACTGAAATTGAAGCTACAACAACAACGTCCTACAGAAG 3316
